roofing

M.H. Goldsmith & Sons Ltd is a long established family firm, incorporated in 1973 and trading for many years prior to that date.

To date we have laid hundreds of thousands of square metres of roof coverings, to a wide range of clients on time, without fuss or disruption. These clients include many local authorities and multi-national companies.

Our aim is to continue providing a high standard of service accommodating new skills and disciplines where necessary.

We will attend to all problems with the same level of attention and commitment to quality and service.

our approach

Whatever your roofing and Cladding requirements are – M.H.Goldsmith and Sons Ltd will meet them.

We can provide the following disciplines:

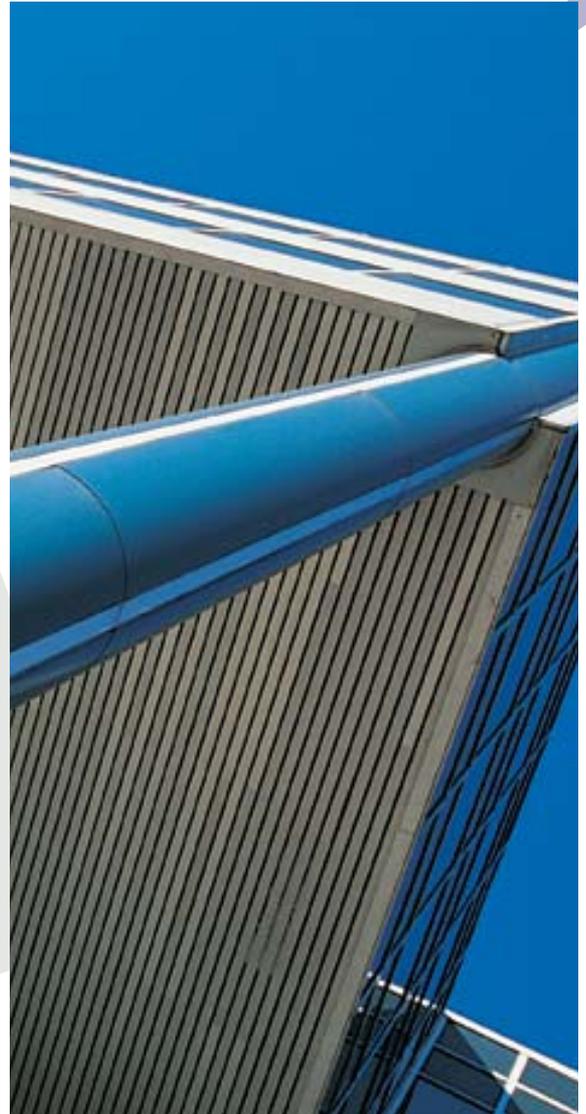

Built-Up Flat Felt Roofing

We can provide high performance felt waterproof roofing within our customer's budgets. Our services include roofs that are built up of layers of felt which we then bond together using Roll and Pour-on Hot Bitumen to ensure a high quality and long-lasting finish. We also use Torch-on systems and can provide Climate Control Insulated Roofing to deal with part L, small or major projects.

In order for us to enable a suitable system that meets our client's needs and requirements, we will carry out an on-site survey and inspection. Then, if required a written report can be provided.

Sheeting and Cladding

As we currently concentrate our professional skills within the flat roofing industry, we can only offer sheeting and cladding works on a selective basis, where flat roofing projects are involved. In these circumstances we can offer various repairs to sheeting, cladding and skylights, including resealing and replacements.

“We pride ourselves on using tomorrow's technology today, to bring a quality service to meet your requirements now”

Liquid Applied Systems

Where there is a danger of fire, or access due to plant location of a particular project, we can provide the following Liquid Applied Systems from normal bituminous coatings to high performance Elastomeric Applied Systems.

Guttering

We are able to offer essential guttering works for both small and major projects. Our expertise includes the repairs and renewal of external guttering, for UPVC, Half Round and Deep Flow, plus Cast Iron Guttering. We will use a tried and tested sealant on repairs, Flintlock Concrete Guttering Complete Sealant.

Asphalt Works

From the point of inspection to completion we can provide repair and replacement services of Mastic Asphalt alongside our flat built-up high performance systems. We can provide Mastic Asphalt works for roofing, ensuring a high level of waterproofing and damp-proof, durable wearing flooring, paving and tanking.

Specialist Services

At the core M.H.Goldsmith & Sons is highly trained and multi-disciplined team, we not only supply first-rate roofing service

but are qualified to undertake asbestos surveys to The Health and Safety Executive's Standard MDH100. We are fully certified in all aspects of asbestos removal, with an attention to safety, quality and cost-effectiveness that is second to none.

Conclusion

The advantages are clear – whether we supply or supply and fix

'At Goldsmith's we pride ourselves on providing our clients with an exceptional standard of work and a high quality of service. From start to finish we maintain a professional but friendly attitude to projects of any size.'

'Our team consists of vastly experienced, knowledgeable and qualified employees. All have been trained to industry and Health & Safety Executive Standards!'

With such a comprehensive range of services available M.H.Goldsmith & Sons limited are able to provide clients with a bespoke package to suit their every need.

We look forward to working with you.

Dennis Goldsmith

Dennis Goldsmith
Managing Director

"Goldsmith's ensured every effort was made to eliminate any stress. They provided us with a high quality of service, which was professional, within our budget and timescale. We would definitely recommend them for any scale roofing works!"
